Super Lemon Haze-(.5ml) \$32.00

GENETICS: Lemon Skunk x Super Silver Haze. EFFECTS: A very citrus-like haze, works fast and lasts long. It is a very powerful high, very balanced between a physical and a cerebral side.

Purple Lemonade (.5ml) \$32.00

GENETICS: Purple X Citrus Cali. EFFECTS: Providing a complex high made up of subtle Sativa kicks and light body-stoned sensations. Zesty flavors are sweetened by a strong sugary seasoning making it the ideal sweet-tooth strain.

Purple Amnesia (.5ml) \$32.00

GENETICS: Amnesia Haze (sativa), Diesel (sativa), and Critical + (hybrid). EFFECTS: With a tangy citrus taste, this euphoric strain is best saved for leisure activities when you don't need to get too much done.

Gorilla Glue #1 (.5ml) \$32.00

GENETICS: Original Glue (AKA. GG4). This indica-dominant phenotype has a more piney aroma than her sister, though they were bred from the same parent genetics (Chem's Sister, Sour Dubb, and Chocolate Diesel). Patients typically look to Sister Glue (GG1)'s heavy-handed effects to treat pain and sleeplessness. EFFECTS: Relaxing/sleepy/happy

The "Shire" (.5ml) \$32.00

GENETICS: Silver Haze x Durban Poison(sativa leaning hybrid). EFFECTS: The Shire is said to be perfect for treating patients suffering from conditions such as chronic stress, depression, ADD or ADHD, mood swings and chronic fatigue. This extract has a super sour and spicy herbal flavor that turns slightly earthy upon exhale with a heavy fruity overtone that's pungent and spicy in nature.
